The difficulty with fractions has to do with two major factors. (1) There are so many rules to learn that students get mixed up with them. (2) Fraction arithmetic needs to be taught using visual models so that students will get a firm grasp of the CONCEPTS before memorizing the various rules. Lastly you will find links to my free fraction videos and to self-teaching fraction books.

Why are fractions so difficult to learn?

A mechanical calculator, or calculating machine, is a mechanical device used to perform the basic operations of arithmetic automatically, or (historically) a simulation such as an analog computer or a slide rule. Most mechanical calculators were comparable in size to small desktop computers and have been rendered obsolete by the advent of the electronic calculator and the digital computer.
