Arson Investigation Basics - interFIRE

Arson investigation starts with the fire itself. To create and sustain a fire three factors must be present. The three factors are known as the fire triangle (Peige ed., 1977). The fire triangle consists of oxygen, a fuel source, and heat. In most cases the percentage of oxygen concentration must be above 16% (Peige, ed., 1977).

Arson Investigation | Crime & Clues

Fire investigation can be performed in two stages. The first involves examination of the fire scene to determine the cause of the fire, its origin, and the development/spread of the fire. The second stage involves laboratory analysis of samples recovered from a fire scene, normally when arson is suspected 1,2 .

June 2020Forensic Investigation in Fire & Arson Cases

Step 1 - Immediate action. In the event of an incident, immediate action to be taken may include making the area safe, preserving the scene and notifying relevant parties. The investigation begins even at this early stage, by collecting perishable evidence, e.g. CCTV tapes, samples. Step 2 - Plan the investigation

Six steps for successful incident investigation | Risktec

Arson investigators are called out to the site of a suspicious fire to determine what exactly caused the fire, and if the fire was set intentionally. If the fire appears to be an arson, rather than an accident, the investigators will try to figure out where in the house the fire started and what was used to start it.

What do Arson Investigators Look for? (with pictures)

After investigators have completed their evaluation of the stage, the guide denotes "Documenting the scene" as the next step in the investigative process. (National Institute of Justice, A Guide for Investigating Fire and Arson 2009) The third step is documenting the scene.
