European crab. In Western Europe crab meat is derived primarily from the species *Cancer pagurus*. *C. pagurus* is a large crab noted for the sweet, delicate flavour of its meat. It is also known as the "brown crab", the "common crab" or the "edible crab". The United Kingdom is the largest fishery for *C. pagurus* with large fisheries in Scotland and a smaller but substantial fishery in the South ...

Dungeness crab fishing delayed by humpback whales hanging ...

The humpback whale gets its common name from the distinctive hump on its back. Its long pectoral fins inspired its scientific name, Megaptera, which means “big-winged” and novaeangliae, which means “New England,” in reference to the location where European whalers first encountered them. Humpback whales are a favorite of whale watchers ...
