### **Why do we see database errors "caused by com.ibm.db2.jcc ...**

In my case I have a dynamic DB2 SQL (mainframe) where my Declare cursor with SELECT resides - in the working-storage. I use a PREPARE statement and Open Cursor passing some parameters that will override the parameter marker (?) in a SELECT. When I run a FETCH I got -305 in a field that has no value (I think that is NULL).
