Hardline 3 The Hacker Series

Battlefield Hardline (abbreviated as BFHL) is fourteenth installment in the Battlefield series, developed by Visceral Games in collaboration with DICE and published by EA. Battlefield Hardline is unique in the fact that it is police themed, focusing on the continual war on crime, rather than military conflicts depicted in all previous Battlefield installments. The game was originally set to ...

> The culture of pretending that only non-Rust deps are deps is incredibly annoying and unproductive. The reason that projects usually only list the non-Rust deps in their readme is because these need to be installed manually by the user in order to build or run the piece of software in question.

Rewriting Sysctl(8) in Rust: Systeroid | Hacker News

I am concerned with 3 letter agencies, but still entertain the idea of maintaining two, unrelated, uncorrelatable, and hopefully forever separate, internet identities. Like an internet-mullet. Business in my name, party behind an alias. The interesting bit would be writing and maintaining two distinct sites/corpus.
