The Global Measure correlates with other measures of fairness and equity in intimate relations. Sprecher (1986,1988), for example, found the Hatfield Global measure is positively and significantly correlated with the Sprecher Global Equity measure (correlations range from $r=.45$, to $.52$, $p<.001$), which was created to measure day-to-day equity.

The Global Measure of Equity Scale | Measurement ...

Sociologists study how these social reforms help shape or change social inequality that exists in a society, as well as their origins, impact, and long-term effects. Today, social media plays a large role in social reform campaigns and was harnessed in 2014 by British actress Emma Watson , on behalf of the United Nations, to launch a campaign for gender equality called #HeForShe.
